

AESOP: THE DIFFERENCES

Are all substitute placement systems the same?

Most substitute placement vendors are starting to offer an ASP (Application Service Provider) solution as an alternative to the outdated calling-box model. Does that mean that they are finally able to match the rich Software-as-a-Service (SaaS) functionality that Aesop has provided for almost a decade? See for yourself:

FUNCTIONALITY	AESOP	SYSTEMS
Substitutes Across Multiple Organizations: Registered substitutes can view and accept jobs at neighboring districts with one ID and pin number, allowing your district access to a larger substitute pool.	YES	NO
Attachments: Within the website application, schools and teachers can attach documents to absences that are then viewable by the substitute after the job has been accepted.	YES	NO
Email Notification: The system can <i>proactively notify</i> substitutes and administrators via email regarding important information such as reports, job assignments, absence cancellations, and substitute cancellations.	YES	NO
Multi-Tenant Architecture: Multi-tenant architecture serves multiple customers on one centralized database. All customers are housed on the same redundant, partitioned database in a world-class data-center to ensure data integrity and security.	YES	NO
Quarterly Updates: Software-as-a-Service (SaaS) allows the release of free upgrades and enhancements to the application that are available immediately to the entire customer base.	YES	NO
Cutting Edge Customer Service: Contact Client Services Representatives not only by traditional phone and e-mail options, but also by the <i>free, instant live chat feature</i> within the application.	YES	NO
Custom Report Writer: Included custom report writer allows district level personnel to create reports on virtually any data in the system. These reports can be easily exported into other formats such as HTML, Delimited Text, Access or Microsoft Excel.	YES	NO

There is a difference. Discover for yourself why Aesop serves more districts nationwide than any other substitute placement system, why over 225 of those districts switched to Aesop from other vendors, and why not one has ever gone back.
