\*\* THESE SANITIZERS CONTAIN ALCOHOL BUT DOES NOT LIST THE PERCENTAGE ON THE MSDS SHEET

1. Yes, we do have hand sanitizer.
2. Kutol <http://www.kutol.com/> and Buckeye <http://www.symmetrysoap.com/> brands.
3. We have several ways they are packaged. I am attaching some information on these products. The Buckeye Symmetry brand is only in a dispenser that you can put on the wall. The Kutol brand we stock in 4 oz santi-gel bottles. In 950ml pump bottles and also in the EZ foam dispenser. We do already have several schools who have the EZ foam dispensers in every classroom. They believe that it has helped them with their absences. Dispensers for this were provided at no charge to the schools.
4. We do have adequate inventory however we have seen an increase in sanitizer purchases due to the H1N1 concerns so we do anticipate that the manufacturers may have a shortage in the future.
5. Your prices are listed on the attachments. There are 4 pages to the attachment.
6. If you can get us information on which you would be interested in and the quantities we can contact the vendors and try to get a contract for even better pricing.

Thank you for considering us and let me know if there is anything else I can do for you. If needed I can send a salesrep down to show you the different dispensers and product in person. Or I can send copies of brochures on these products in the mail. However I have provided the websites which should give you most of the information on the actual products.
